Killer Shell CKS Simulator Score

874e6d1e-52f5-45b1-9873-2f485831c69b

2022-10-06 (717 minutes ago)

This simulator is more difficult than the real certification
We think this gives you a greater learning effect and also confidence to
score in the real exam. Most of the scenarios require good amount of work
and can be considered "hard". In the real exam you will also face these
"hard" scenarios, just less often. There are probably also fewer questions
in the real exam.

Solved subtasks:

65 / 75

High Score

Scenario 1	**2** of **2**
File /opt/course/1/contexts contains all contexts	✓
File /opt/course/1/cert contains cert	✓

Scenario 2	**3** of **4**
First deployment scaled down	✓
Second deployment scaled down	✓
File /opt/course/2/falco.log exists	✓
File /opt/course/2/falco.log has correct format	✗

Scenario 3	**1** of **2**
Apiserver --kubernetes-service-node-port=31000 not set	✗
Service kubernetes is type ClusterIP	✓

Scenario 4	**0** of **5**
Apiserver has PodSecurityPolicy Admission Plugin enabled	✗
PodSecurityPolicy exists	✗
PodSecurityPolicy AllowedHostPaths only includes specified directory	✗
ClusterRole exists	✗
RoleBinding exists	✗
